

SANMINA-SCI®

# NPI EXPRESS Services

## When counting the hours, not the days!

**Dedicated manufacturing services for emerging business needs.**

Sanmina-SCI offers world-class NPI centers to serve as gateways to volume manufacturing capabilities.

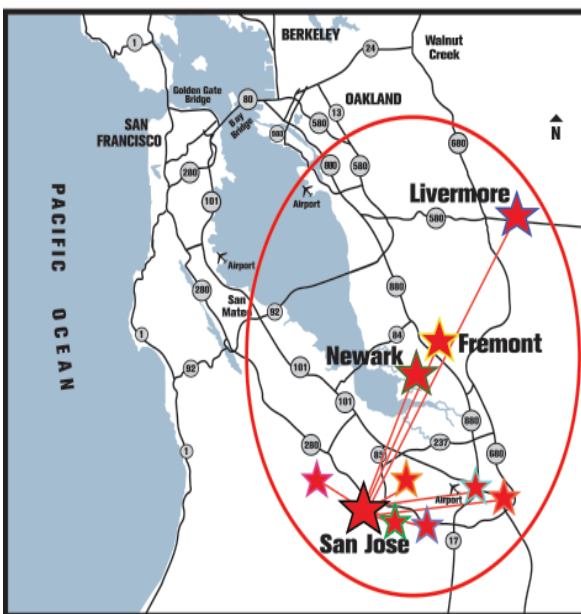

With 10 locally linked Bay Area sites, Sanmina-SCI® offers a unique “NPI Express Service” to our customers. This service provides customers complete printed circuit board (PCB) fabrication to quickturn PCB assembly services – delivered to the door in as little as five days. All 10 locally linked Bay Area sites offer cables, backplanes and Joint Design Manufacturing (JDM) services,

PCB fabrication, NPI quickturn manufacturing, enclosures and precision machining. The close proximity of the sites allow Sanmina-SCI to respond to Bay Area customers’ needs on a real-time basis, even on daily customer engineering changes.

### NPI Express Services customers receive:

- **Speed** – PCB fabrication to quickturn PCB assembly services; delivered to the door in as little as five days
- **Flexibility** – respond to Bay Area customers' needs on a real-time basis
- **Scalability** – gateway to volume manufacturing
- **Customer satisfaction** – quality, delivery and price
- **Brand recognition** – Tier 1 EMS supplier
- **Vertical integration** – 10 locally linked Bay Area Sanmina-SCI sites

### TEN LOCALLY LINKED BAY AREA SANMINA-SCI SITES

- ★ San Jose - Zanker Cables & Backplanes
- ★ San Jose - O'Toole PCB Design
- ★ San Jose - Ringwood Design & JDM
- ★ San Jose - Senter Industrial Semiconductor
- ★ San Jose - Bering PCB Fabrication
- ★ San Jose - Plumeria Plant 2 NPI Quickturn Manufacturing
- ★ San Jose - Plumeria Plant 4 Production Manufacturing & Engineering
- ★ Fremont Enclosures
- ★ Newark Precision Machining
- ★ Livermore Precision Machining

The NPI Express Service gives customers added flexibility, convenience and speed providing them the opportunity to rapidly introduce innovative new technology products to the marketplace.

- Locally linked Bay Area Sanmina-SCI sites give customers the ultimate in vertical integration
- Completely linked end-to-end services provide customers with total EMS solutions (i.e., cables, backplanes, PCB fabrication, PCB design, quickturn manufacturing, enclosures, precision machining)
- The NPI Express Service advantages are quality, delivery and pricing. Issues are expedited and resolved, and communicated quickly back to the customer.

Today's Emerging Businesses present challenges to the EMS provider that includes rapid introduction of new technology and time-to-market to providing rapid global availability on path to volume.

Emerging Business needs include:

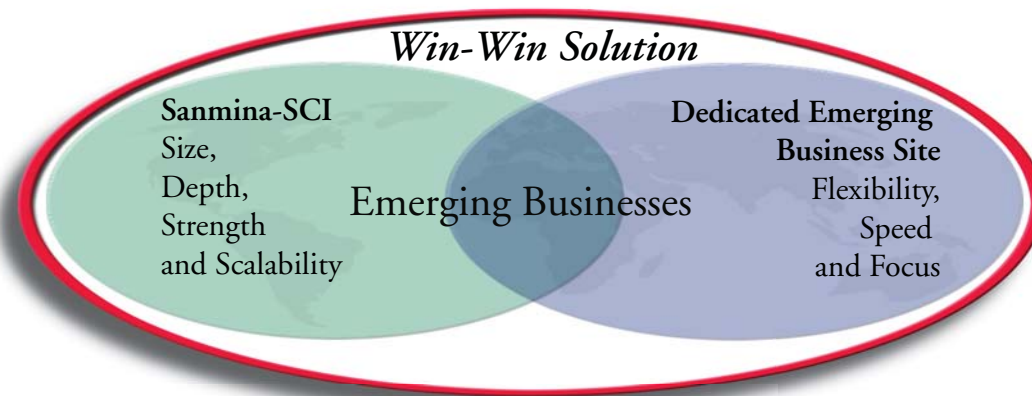

- Speed and flexibility
- Conserving cash
- Scalability
- Customer satisfaction
- Brand recognition

To address these challenges, Sanmina-SCI provides a win-win solution with the "Best of Both Worlds" – combining the size, depth, strength and scalability of Sanmina-SCI with the dedicated Emerging Business Model that offers:

- Flexibility – Quickturn manufacturing
  - Standard five-day manufacturing turn with optional one-day service
  - Quick response to design and engineering changes
- Speed – Responding quickly to the customer's needs
  - 24-hour or less labor quotes
  - Material quotes in five days or less
  - Products can be delivered to the doorstep daily
- Focus – Dedicated services focused on the specific needs of the Emerging Business market segment
  - Emerging Business will not be a "small fish in a big pond" with Sanmina-SCI's focused Emerging Business Model
  - Customer focus team that is centered on the daily needs of the customer such as quality, delivery and technical services

With the "Best of Both Worlds" model, Emerging Businesses now have the opportunity to partner with a Tier 1 EMS provider giving them and their product additional credibility and scalability in the marketplace. When customers need uninterrupted and efficient delivery, and rapid time-to-market at the lowest possible cost, they can count on Sanmina-SCI's NPI Express Services.

## “Best of Both Worlds”

### About Sanmina-SCI

Sanmina-SCI® Corporation is a leading Electronics Manufacturing Services (EMS) provider focused on delivering complete end-to-end manufacturing solutions to technology companies around the world. Sanmina-SCI's service offerings include innovative product design and engineering, test solutions, manufacturing, IT expertise, logistics and post-manufacturing repair/warranty services. Sanmina-SCI is recognized as a technology leader with major global operations in over 20 countries and on five continents.
