FOR IMMEDIATE RELEASE

SANMINA-SCI DELIVERS 600TH DATA CONCENTRATOR UNIT TO THE UNITED STATES ARMY

SAN JOSE, Calif. – August 16, 2007 – Sanmina-SCI Corporation (Nasdaq NM: SANM), a leading global electronics manufacturing services (EMS) company, today announced its Defense and Aerospace Systems Division based in Huntsville, Alabama, delivered the 600th Data Concentrator Unit (DCU) to the United States Army. The significant milestone was marked by a ceremony held at Sanmina-SCI's Defense and Aerospace production facility in Huntsville earlier today.

The DCU was developed under contract for the United States Army Technology Applications Program Office (TAPO) as a component of the Common Avionics Architecture System (CAAS) now being integrated in the CH-47F Chinook and UH-60M Blackhawk. The CAAS DCU is a flexible, powerful and robust device designed to interface and format discrete, analog and avionics bus data from various aircraft equipment and sensors, transmitting the data over MIL-STD-1553, RS-422 and ARINC-429 digital data busses.

"We are extremely proud to play a part in our nation's defense through our association with the U.S. Army and our DCU program," said Jim Cocke, Senior Vice President of Sanmina-SCI's Defense and Aerospace Systems Division. "Delivering the 600th DCU marks another key milestone for Sanmina-SCI's Defense and Aerospace Systems team, and exemplifies our commitment to delivering technical excellence and quality services to our customers."

U.S. Army officials as well as federal, state and local government dignitaries joined Sanmina-SCI executives and employees in Huntsville to celebrate the milestone. Boeing, ITT, Rockwell Collins and Sikorsky officials also were in attendance.

About Sanmina-SCI

Sanmina-SCI Corporation is a leading electronics contract manufacturer serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market.

Recognized as a technology leader, Sanmina-SCI provides end-to-end manufacturing solutions, delivering unsurpassed quality and support to OEMs primarily in the communications, defense and aerospace, industrial and medical instrumentation, multimedia and consumer, computing and storage, and automotive technology sectors. Sanmina-SCI has facilities strategically located in key regions throughout the world. More information regarding the company is available at <http://www.sanmina-sci.com>.

Sanmina-SCI Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales to principal customers, the ability of Sanmina-SCI to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in the Company's fiscal year 2006 Annual Report on Form 10-K filed on January 3, 2007 and the other reports, including quarterly reports on Form 10-Q and current reports on Form 8-K, that the Company files with the Securities Exchange Commission.
