

CORPORATE BACKGROUNDER

About Sanmina-SCI®

Sanmina-SCI® Corporation is among the world's largest Electronics Manufacturing Services (EMS) companies, with revenue totaling USD \$7.2 billion for fiscal year 2008. Sanmina-SCI is recognized as a technology leader, providing complete end-to-end manufacturing capabilities and highly complex solutions to technology Original Equipment Manufacturers (OEMs) primarily in the communications infrastructure, defense and aerospace, industrial and semiconductor systems, medical instrumentation, enterprise computing and storage, multimedia, automotive and renewable energy sectors. Sanmina-SCI has facilities strategically located in key regions throughout the world with major global operations in 18 countries on four continents.

Dedicated End Markets

Vision means the ability to anticipate how the EMS market will evolve and how Sanmina-SCI will play a leadership role. Sanmina-SCI's leadership is dependent on a strategic focus in dedicated end markets. By organizing the Company with a focused market-segment approach, Sanmina-SCI is able to provide more value and customized solutions to each of its customers.

Sanmina-SCI's Dedicated End Markets:

- Communications Infrastructure
- Defense and Aerospace Systems
- Enterprise Computing and Storage
- Industrial and Semiconductor Systems
- Multimedia
- Medical Instrumentation
- Automotive
- Renewable Energy

Sanmina-SCI's Core Business Sectors:

- Design and Engineering
- Printed Circuit Board (PCB) Fabrication
- Backplanes
- Cables
- Enclosures/Machining/Assembly
- Modular Solutions
- PCB and Final System Assembly
- Plastic Injection Molding
- Optical Solutions

Customers in each of these market segments partner with Sanmina-SCI for their design, supply chain management, manufacturing and logistics requirements whether in North America, Europe or Asia.

A Commitment to the Customer, Technology and Quality

Today, more than ever, customers of all sizes, geographic locations and end markets chose Sanmina-SCI as a trusted partner. Since its establishment in 1980, Sanmina-SCI has adhered to a management philosophy that puts the customer first, delivering what each defines as value. As a trusted partner, Sanmina-SCI provides value through design and engineering, printed circuit board fabrication and assembly, backplanes, cables, enclosures, machining, Build-to-Order (BTO) and Configure-to-Order (CTO) expertise, logistics and post-manufacturing repair/warranty services.

Sanmina-SCI's emphasis on innovative technology, quality and complete end-to-end manufacturing solutions drives its business and provides customers with the necessary advantages to compete in the global marketplace. Whether Sanmina-SCI is designing and prototyping products in one of its New Product Introduction (NPI) centers, launching new products in one of its lower-cost, high-volume manufacturing facilities, deploying the personnel needed to meet a customer's demand or delivering shipments to a major global market, the Company takes every measure to ensure excellence in quality and industry-leading processes that make up every Sanmina-SCI operation.

Worldwide Partnership

Sanmina-SCI's worldwide partnerships are diverse and span the entire technology landscape within the communications infrastructure, defense and aerospace systems, industrial and semiconductor systems, medical instrumentation, enterprise computing and storage, multimedia, automotive and renewable energy sectors. OEMs of all sizes rely on Sanmina-SCI to provide global manufacturing solutions that meet their unique design, assembly and delivery requirements. Even more, these global solutions are coordinated and managed by one IT platform that provide its customers with access to key data and product status relative to their individual manufacturing programs.

CORPORATE BACKGROUNDER

Service and Innovation

To Sanmina-SCI, service means the ability to understand and focus on the customer's needs. The Company's business strategy and day-to-day operations are based on feedback primarily from its customers, and we have grown one customer at a time. Today, Sanmina-SCI's balanced approach to the EMS industry enables the Company to effectively service customers within its dedicated end markets.

Sanmina-SCI's innovation strategy is a powerful differentiator. With experienced design and engineering personnel distributed across its various market-focused divisions, Sanmina-SCI helps advance its customer's technologies and products. Sanmina-SCI has the vision and technological know-how to drive down manufacturing cost while developing new technologies that solve unique customer demands, further strengthening its total manufacturing capabilities. The Company's ability to innovate is just one more reason why customers select Sanmina-SCI as their partner of choice.

Information Technology Strategy

In order to secure every possible advantage for its customers, Sanmina-SCI continues to invest in its information technology system and capabilities. With a world-class information technology group, Sanmina-SCI ensures global consistency and superior supply chain visibility to each customer – anywhere in the world. Best-of-breed software technology includes applications in product design and engineering, order and production status, material planning and logistics, and supply chain management, each geared to provide the customer with a consistent experience across the entire organization.
